On 19 March 1951, six MiG-15s were marked in the northeastern corner of Brandis (N 52/E 31) airfield. No markings could be seen on the planes because of the distance. One MiG-15 was parked in front of the hangar which was located farthest west and was partially open. A trainer or fighter, painted green, was seen in front of the middle hangar. This hangar was also partially open. There was no flying during the hours . At about 8:10 a.m. two jet fighters and one biplane took off from the field and headed east. *

* **Comment.** The report does not contain any indications of possible changes in the occupation or the status of the airfield. One fighter regiment is still believed to be stationed in Brandis.
